Ocean Stewardship

Our ships utilize the latest hybrid power management systems, maximizing fuel efficiency and reducing our impact on the environment. We minimize underwater noise that stresses marine wildlife by using a hydro-jet propulsion system that allows us to cruise virtually silent up to five knots for incomparable, up-close encounters while keeping the sensitive ecosystem in mind. To prevent damage to the fragile ocean floors, we avoid using anchors to maintain ship position by using a GPS-based Dynamic Position System. And we build our ships with the latest, most advanced waste management and water treatment plant in the industry. We control waste on board and dispose of it responsibly. Plus, we offer still and sparkling water delivered in a complimentary reusable water bottle to help reduce waste.
