TASMANIA AND AUSTRALIA
THE BEST OF TASMANIA BY LAND AND SEA
WITH SEVEN NIGHTS ABOARD THE CORAL DISCOVERER JANUARY 8–22, 2020
DEAR ALUMNI, PARENTS, AND FRIENDS OF DARTMOUTH,

I invite you to join us as we discover Tasmania, a ‘curious island at the edge of the world’. Australia’s smallest state and the most geographically diverse, Tasmania is a place of wild and dramatic scenery, abundant wildlife and history evoked by world-famous convict ruins.

Fly from Sydney to Launceston, Tasmania, and begin the exploration of this unique and untamed world. Spend five days exploring the northern region of Tasmania, including Cradle Mountain National Park. See the unique Tasmanian Devil and learn about the history of the region. Continue to Hobart and board the 72-passenger expedition ship Coral Discoverer for a seven-night cruise to the farthest reaches of Tasmania’s rugged coast. A true open-ocean expedition ship, Coral Discoverer’s shallow draught and maneuverability allow her an unmatched ability to enter the shallow bays and inlets of Tasmania’s otherwise virtually inaccessible West coast. Join John Stomberg, Director of the Hood Museum of Art, and an expert Expedition Team to discover Tasmania’s remote coastline by expedition ship and experience all that Tasmania offers.

An optional pre-trip extension to the Great Barrier Reef and an optional post-trip extension to the Outback and Uluru are available as a memorable way to begin and end this exciting adventure.

Dartmouth Alumni travelers will be sharing this cruise program with travelers from Harvard, National Trust for Historic Preservation and MIT. The Coral Discoverer has 36 staterooms and I encourage you to reserve your cabin now.

With regards from Hanover,

Robin K. Albing, Tu’81
Director, Lifelong Learning and Advancement Special Projects

JOHN R. STOMBERG

John R. Stomberg is the Virginia Rice Kelsey 1961s Director of the Hood Museum of Art at Dartmouth College. Before joining Dartmouth, he served as the Director of the Mount Holyoke College Art Museum and the Joseph Allen Skinner Museum, and held leadership positions at the Williams College Museum of Art and the Boston University Art Gallery. He holds a B.A. from Georgetown University and both an M.A. and Ph.D. from Boston University—all in art history. Moving between photography, prints, paintings, sculpture, media art, and installation work, his exhibitions have been conceived to broaden our understanding of how art operates in, and often shapes, society. He publishes on modern and contemporary art and issues directly related to museums, education, and academia. Dr. Stomberg is excited to have the opportunity to lecture on Aboriginal art and contemporary Australian art, two areas of growing specialization for Dartmouth’s Hood Museum, which recently acquired new collections in these areas. He will also discuss how the newly remodeled Hood Museum’s architectural features facilitate teaching with art.
ANDREW BERRY

Andrew Berry has a degree in zoology from Oxford University and a PhD in evolutionary genetics from Princeton University. He was a Harvard Junior Fellow, and is currently a lecturer on Organismic & Evolutionary Biology at Harvard. Combining the techniques of field biology with those of molecular biology, Dr. Berry’s work has been a search for evidence at the DNA level of Darwinian natural selection. He has published on topics as diverse as giant rats in New Guinea, mice on Atlantic islands, aphids from the Far East, and the humble fruit fly. He has given lectures on evolutionary topics to popular audiences all over the world—from Ankara to the Antarctic. As an educator and popularizer, he seeks to demystify the most important and most misinterpreted of all biological ideas, evolution.

CRUISE for seven nights aboard the Coral Discoverer, featuring 36 recently refurbished premier staterooms.

EXPLORE the untouched Tasmanian Wilderness World Heritage Area at Port Davey and Bathurst Harbour. Normally accessible by a seven-day hike, this region is undoubtedly one of the most pristine and beautiful landscapes on earth.
