Northern Lights and the Canadian Caribou Migration

Experience authentic Canadian hospitality at a genuine fly-in wilderness lodge
Dear Alumni, Parents, and Friends,

Venture with us into the vast Canadian North—a remote tundra teeming with glacial landforms, boreal forest, and beautiful wilderness—accessible only by plane or boat. The destination: an exclusive, supremely outfitted lodge that will be home base amidst days filled with wildlife spotting and outdoor adventures, and evenings featuring delicious dinners followed by opportunities to watch for the northern lights. Northern Manitoba is considered to be one of the best places in the world to view this phenomenon, and fall is considered the best time to comfortably view the aurora borealis and to experience the other wonders of this extraordinary region.

Discover the uniqueness of the area during guided interpretive tours focusing on wildlife, botany, and geography, and learn about local plant life the First Nations Peoples used for food sources and medicines.

At the lodge, take advantage of leisure activities like hiking, fishing, and kayaking or canoeing, or join optional excursions to further explore the area.

Space is limited. With significant savings of more than $800 per couple, we anticipate this tour will fill quickly, so be certain to reserve your spot today and share this brochure with family and friends who may be interested in traveling with you.

Reserve today online at alumni.dartmouth.edu/learnandtravel/travel, by phone at (866) 639-0079 or by returning the enclosed reservation form.

Warmly,

Program Highlights

• Experience true Canadian hospitality at Gangler’s North Seal River Lodge in Northern Manitoba—an exclusive property renowned for its extraordinary service and cuisine—situated approximately 200 miles from the nearest road and accessible only by air.

• Relish pristine viewing of the northern lights in September that will leave you breathless. Northern Manitoba is considered to be one of the best places in the world to view the aurora borealis.

• Set out on a full-day wildlife spotting excursion (by air and by land) during the annual caribou migration—where wolves, bears, bald and golden eagles, wolverines, and scavengers follow this traveling ecosystem.

• Admire the geologically rare landscape sculpted thousands of years ago by retreating glaciers that left meandering formations of gravel and sand called eskers.

• At the lodge, choose from a variety of outdoor activities including hiking, biking, birding, lake tours, and fishing.

• Enjoy guided tours and lectures led by local naturalists—including resident biologist, Dr. Brian Kotak, and First Nations guides—specializing in the region’s geology, geography, flora and fauna, and indigenous communities.

• Participate in workshops directed by a local professional nature photographer to learn techniques for optimum aurora, wildlife, and landscape photography.

• What’s Included: Five nights accommodations at high-end properties; 4 breakfasts, 1 brunch, 3 lunches, and 4 dinners; full guiding services of an Orbridge Expedition Leader and local experts; all activities listed on the 6-day itinerary (unless noted otherwise); all fishing license requirements; all excursion transportation; gratuities to Orbridge Expedition Leader, local guides, drivers, and wait staff for included meals; and airport transfers for guests arriving and departing during the suggested times.

Activity Level: To fully enjoy and participate in all aspects of this program, guests should be able to stand for 90 minutes at a time without sitting, walk a slow-paced mile on uneven terrain without difficulty, and enter/exit skiffs with little trouble.

Special Faculty Host: Dr. Kristina Anne Lynch

Dr. Kristina Anne Lynch is an experimental physicist specializing in the plasma physics of the auroral ionosphere (i.e. the scientific phenomena responsible for the Northern Lights). She has been teaching in the Physics and Astronomy Department at Dartmouth College since 2002. Her undergraduate degree was in Physics from Washington University in St. Louis (1984). After college, she spent four years at the Air Force Geophysics Laboratory in Massachusetts, working on the Combined Release and Radiation Effects Satellite (CRRES). She completed her PhD in Physics at the University of New Hampshire in 1992, focusing on auroral sounding rockets. From 1992 to 2002 she worked at the University of New Hampshire’s Space Science Center on sounding rockets and the European Cluster satellite project. She is a member of the American Geophysical Union.
